

Jets GPS' **Plug n Go** tracker is perfect where you can't install a hard wired vehicle tracker and your company would benefit from the management information from vehicles during working time.

Our **Plug n Go** plugs into the vehicle cigarette lighter charger for business journeys and can just be removed for private journeys.

It's that simple.

Ideal for:

- Paying accurate mileage claims, reducing staff administration and mistakes
- Logging accurate business mileage for HMRC compliance
- Sales fleets
- Staff using their own cars for work
- Hired vehicles
- Pool tracker for multiple vehicles
- Senior management vehicles

**Plug n Go** provides your company with all the cost savings, benefits and management information of hard wired vehicle tracking without installing a traditional tracker.

Just **Plug 'n' Go**

Call Jets GPS on **01254 914 538** or e-mail **info@jetsgps.co.uk** for more information, an online demonstration and a quotation today.
